MDP to DVI adapter

Technical sheet

Aiino's Mini DisplayPort to DVI adapter allows you to connect the most recent Apple personal computers to legacy monitors and projectors equipped with DVI interface.
It is a useful accessory for those that, while working in conference rooms, want to be sure to be always connected with their own laptop to most of the audio-video conference room equipments, since DVI interface is still very common.
Otherwise this is the accessory for the ones that want to improve productivity by adding a second monitor to their own laptop.
This adapter fits on new Thunderbolt ports, which are implemented on new Apple computers.

Technical Specifications
